SaveSorb
Save time, money and the environment

A totally natural, sustainable product, SaveSorb is sieved, treated and pH balanced to become the most effective absorbent of hydrocarbons and chemicals on the market.

Oils and chemicals are soaked up within SaveSorb's molecular structure and will never leach out. It's also hydrophobic so repels water. Spill clear up has never been quicker, easier or cleaner.

All SaveSorb products are designed to prevent, contain and absorb contamination – now available from OnSite Support. See overleaf for more details.
