Staying safe in cold weather: A guide for those working in the built environment

As winter approaches and temperatures begin to plummet, ensuring safety and warmth on site is more crucial than ever. We are excited to present our Cold Weather Catalogue 2026/27, specifically created for those working in the built environment. Our collection features a comprehensive range of PPE, consumables, and site equipment designed to help you tackle the cold conditions.

Stay Safe and Comfortable

Our catalogue offers everything you need to maintain safety and comfort during the coldest months. Whether you're in need of high-visibility jackets, thermal gloves, or heating solutions, we have selected products to meet your needs.

When working in cold weather, it's essential to prioritise safety. Here are some tips to help you and your team stay safe:

1. Layer Your Clothing: Wear multiple layers to trap heat while allowing moisture to escape. Start with a moisture-wicking base layer, add insulating layers, and finish with a waterproof outer layer.
2. Take Regular Breaks: Schedule frequent breaks in a warm area to prevent fatigue and allow your body to warm up. Pay attention to any signs of cold stress, such as shivering or numbness.

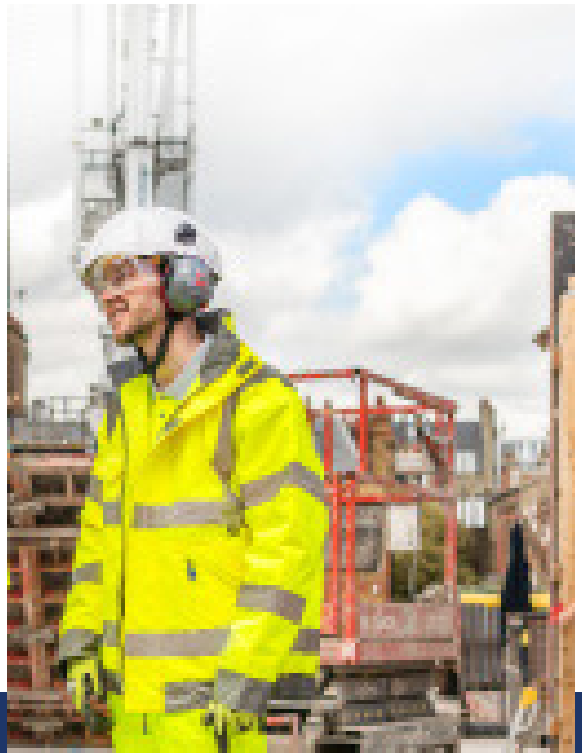

3. Stay Hydrated: Cold weather can dehydrate you just as much as hot weather. Drink plenty of fluids to stay hydrated, even if you don't feel thirsty.

4. Use appropriate PPE: Ensure you are equipped with high-quality PPE designed for cold weather, such as insulated gloves, hats, and footwear, to protect against frostbite.

5. Be Aware of the Risks: Understand the signs of cold-related illnesses, like hypothermia and frostbite. Educate your team on these risks and encourage them to report any symptoms immediately.

Browse through our catalogue to find products to suit your cold weather needs. Our selection is designed not only to protect but also to enhance productivity, ensuring your team remains efficient and effective throughout the colder seasons.

The following contents are just a selection of our most popular solutions. Please contact us or visit our website for more options and alternatives.
