

Sustainable Procurement Statement

OnSite Support Limited is a specialist in procuring products and supplying to the construction industry in the UK and overseas. We recognise that in delivering this service we and our supply chain make procurement choices that can have an environmental, economic and social impact on society and the community that we operate in.

Our Directors have developed a Sustainable Procurement Policy which outlines how we and our supply chain will influence procurement choices of products and services to increase value for money, reduce consumption of primary resources and use materials with fewer negative impacts on the environment. By operating in line with this policy we will play our part in reducing risks, safeguarding natural resources, improving resource efficiency, reducing waste, saving money and stemming the loss of biodiversity.

OnSite Support Limited Sustainable Procurement aims and objectives are to:

- Influence our supply chain to make sustainable procurement choices in recycling and reusing
- Educate our employees to always consider sustainability when planning projects
- Procure sustainable products whenever possible, giving due consideration to products with recycled content and end of life use
- Purchase products that adhere to British standards and ISO9001 / 14001 standards
- Use local suppliers and employment, where possible, to minimise on transportation and to support the local economy
- Explore industry technologies that enable us to reduce our carbon footprint
- Ensure that fair contract prices and terms are applied and respected, and that ethical, human rights and labour standards are met throughout our supply chain

This policy is made available to all new employees at induction and can be found on the Notice Board and in the Employee Handbook.
