CONSTRUCTOR FILTER MAT

The Constructor spill containment mat is a light and user friendly method of spill containment; designed to replace existing, drip trays.

- Polyethylene and PVC construction is lightweight but durable - folds for quick and easy storage or transport.
- Replaceable liners quickly capture oil, grease and fuel leaks and spills. Allows clean water to pass through while filtering out any hydrocarbons.
- Two-inch, foam sidewalls provide structure and help contain stormwater during periods of quick or large amounts of rainfall - ensures Constructor spill containment mat has filtering time.
