How To Choose The Right PPE This Summer?

Working in construction during summer poses a number of risks to site workers, as high temperatures, humidity and direct sunlight can lead to heat exhaustion, dehydration and sunburn. It is important for workers to take extra precautions to protect themselves from these hazards. Continue reading to find out how you can help your team to protect themselves this summer.

Choosing Appropriate PPE

One of the most effective ways to stay safe in the summer is to wear appropriate personal protective equipment (PPE). When working outside in the heat, it is important to wear lightweight, breathable clothing that covers as much skin as possible.

When choosing your summer PPE, you should look for garments made from moisture wicking materials. These fabrics are designed to pull moisture away from the skin, keeping workers cool and dry. Some examples of wicking materials include synthetic fabrics, such as: polyester, nylon and spandex. These materials are lightweight, breathable and easy to move in - making them ideal for construction work.

- If a clothing item is labelled as **moisture-wicking**, it won't absorb or retain moisture.
- When exposed to the air, a garment labelled as **quick-drying**, will move moisture to the materials surface and dry faster than cotton.
- When a garment is labelled as **breathable**, this means it will allow air to pass through, therefore preventing the air closest to your body getting trapped, and causing you to get hot and sweat more.

Know the signs of heat exhaustion and heatstroke: Symptoms of heat exhaustion include heavy sweating, weakness, dizziness, nausea, and headache. If left untreated, heat exhaustion can progress to heatstroke, which is a medical emergency. Symptoms of heatstroke include a high body temperature, confusion, seizures, and loss of consciousness. If you or a coworker experience any of these symptoms, seek medical attention immediately.

Protecting Your Skin

Sun exposure can pose serious health risks to construction workers and prolonged exposure to the sun's harmful ultraviolet (UV) rays can lead to sunburn, skin cancer, and other skin damage. Workers who spend a lot of time outdoors should take steps to protect themselves from the sun.

To prevent sun damage, it is important to wear protective clothing such as long-sleeved shirts, long trousers, and wide-brimmed hats. Sun cream with an SPF of at least 30 should also be used on any exposed skin. Workers should reapply sun cream every two hours, where possible.

Staying Cool & Hydrated

Working on construction sites can be both physically and mentally demanding, which is why, during the summer months, it is important to stay cool and hydrated, to prevent heat exhaustion and heatstroke. Here are some tips to help you stay safe and comfortable on construction sites.

- **Drink plenty of water:** Make sure to drink water frequently throughout the day, even if you don't feel thirsty. By the time you feel thirsty, you may already be dehydrated. Keep a water bottle with you at all times and take regular breaks to refill it.
- **Take breaks in shaded areas:** When possible, take breaks in shaded areas to avoid direct sunlight. If there are no shaded areas available, create your own shade using umbrellas or tarpaulins.
- **Avoid caffeine and alcohol:** Caffeine and alcohol can dehydrate the body, making it harder for you to stay cool and hydrated. Stick to water, sports drinks, or other non-alcoholic beverages.

"This summer, many people in UK construction will have to work in hot conditions, potentially putting their health and safety at risk. PPE is an important element of any hot weather working strategy."

Icons Explained

OEKO-TEX Certified
The product has been tested for harmful substances to protect your health.

GO/RT approved
The product has been tested and certified against GO/RT testing to a certain rating.

ISO Number
Shows the ISO Rating of that product.

Green Range
The product is part of our sustainable product range.

UPF UV Protection
The product has a UPF UV protection rating.

Made From Plastic Bottles
The product has been made from recycled plastic bottles.

BS/EN Rating
Shows the BSEN, BS, and EN Rating of that product.

Made with 100% recycled material
The product has been made from 100% recycled materials.

RIS Rating
Shows the RIS Rating of that product.

Women's fit
The product comes in women's fit.

EN ISO Rating
Shows the EN ISO Rating of that product.

Home Washes at °C
The product can be washed at home at a certain degrees.

IEC Rating
Shows the IEC Rating of that product.

LEO WOOLSERY ISO 20471 Class 3 COOLVIZ ECOVIZ Sleeved Polo Shirt

- Split-hem design

- Suitable for most safety glasses, wide vision goggles and over glasses

Code
B9954550

Glasses Hanging Cord

- Universal glasses hanging cord suitable for most safety glasses

Code
B9959002

Your lean tool to:
Greater value. Better efficiency.
Better safety. Lower environmental impact.
Improved collaboration.

Construction sites all over the UK are finding it challenging to operate as efficiently as they could. Whether that's excessive waste, poor order management or safety breaches, many companies in the industry are losing money, wasting time and harming the environment without knowing how to fix it.
