- 50 **Site Equipment**

*everybody matters*

# At OnSite Support, we believe that we can all work together to provide a better future for generations to come. But we cannot do it alone.

Our Green range is another significant step we have taken in our ongoing drive to reduce the environmental impact of our product ranges to the absolute minimum.

We have already taken great strides in this direction, introducing clothing ranges made from recycled products, replacing plastic packaging with compostable bags and including FSC certification for timber products. Over the coming years we will replace single use plastic and synthetic materials with environmentally friendly alternatives across as many of our ranges as possible, and we are actively working with our supply chain partners to further expand our ranges of eco-friendly products.

This last point is critical. Like every responsible company, our objective is to provide the foundations for a better, cleaner, greener future. However, this can only be achieved by working together with our customers and suppliers, by forming partnerships and encouraging sustainable practice throughout our respective businesses.

Only then can we continue to deliver the Safety & Clothing ranges, the site welfare materials and the equipment and tool ranges that you need, while at the same time reducing the impact we have on the world around us.

The Green ranges in this catalogue are evidence of this commitment. Among the brands you will find here are the likes of LEO, Regatta and Traffi; all of which lead the way in terms of innovative product design, either in the form of recycled materials or eco-friendly carbon-neutral production.

Our aim is to grow our Green range and in doing so, remove 7,000 kg of single use plastic from the environment. We are pleased to welcome you to our green revolution.

# Our Mission and Values

## Our mission

The mission of OnSite Support is to deliver safety, welfare and site equipment for the construction industry by putting people first. We do this by listening to our client's needs and establishing a solution that's unique to them.

We start with the person and not the product. By getting to know you properly we can deliver for you better; the right products for you, put into the hands of the right person, at the right time, without fail. Our "can do" attitude is crucial to the excellent customer support we provide for our clients, ensuring we go the extra mile to deliver what they really need.

We seek to expand our approach to fostering positive change in the industry, by driving digital growth, cultivating an innovative ethos, providing sustainable solutions, and promoting respect for diversity in an age of global community.

In doing this, we will work with you to help maintain safe, productive sites, so that your business can profit and grow.

## Our values

### **We care about people**

We put people first. We invest in personal relationships. We look after our clients and each other.

### **We're positive and helpful**

We approach every interaction with a 'can-do' attitude. When we encounter challenges we work together to find the solution.

### **We go the extra mile**

We don't just tick boxes. We ask ourselves "what does our client really need?" and find a way to deliver it.

### **We're committed to learning and innovation**

We're always learning. We use that knowledge to help our clients, and to consistently lead on innovation.

### **We strive for excellence**

We seek to be the very best at what we do, so that our clients, in turn, can excel and thrive.

*everybody matters*

# PPE and Packaging Recycling Service

The UK construction industry produces a large amount of waste – in fact in 2018, construction, demolition and excavation accounted for an astonishing 62% of the UK's total waste, according to the Department for Environment, Food and Rural Affairs\*. That's a lot of waste!

## How Can We Help?

Throughout the lifespan of a project sites use a wide range of PPE. But do you know what happens to your PPE once you're done with it?

Currently around 40% of all waste from construction sites ends up at landfill, leading to an increase in harmful greenhouse gasses.

We can turn your discarded PPE into useful fibres, working towards a circular economy and ensuring we offer the best possible solution for end of life PPE.

## Why Choose PPE Recycling?

- PPE recycling offers 100% diversion from landfill
- Evidence of working towards a circular economy
- Evidenced end of life solutions with fully auditable reporting on waste streams
- Secure certified destruction of company and project logos
- Supporting the environment for future generations

## To find out more about our PPE and Packaging Recycling Service visit

[www.onsite-support.co.uk/recycling](http://www.onsite-support.co.uk/recycling)

To discuss your options, call us on 01293 744 444 or email [recycling@onsite-support.co.uk](mailto:recycling@onsite-support.co.uk)

# PPE and Packaging Recycling Service

## How does it work?

### Step 1: Requesting Your PPE Recycling Service

Contact us to request your 240L or 660L Recycling Wheeled Container and PPE recycling woven sacks.

### Step 2: Collection

Once you have 5 or more PPE recycling collection sacks filled, please follow the instructions on the lid of the bin to request collection.

Either OnSite Support or our service provider will collect all cable tied, tagged sacks from one central location, which has to be the same as the delivery postcode.

Your collection date will usually be within 48 hours, however, to maximise logistics efficiencies and minimise unnecessary journeys (to reduce CO<sub>2</sub>), your collection date may be up to 10 working days later.

### Step 3: Confirmation of Collection

Either OnSite Support will collect at the same time as making a delivery and stay in contact with you throughout the process, or our service provider will contact you to arrange collection.

### Step 4: Tracking Your PPE Recycling

Once your PPE has been collected, OnSite Support will pass the collection on and at the end of the month, we will receive full reporting on the different waste streams used to recycle your materials.

FORS – Due to our fleet being FORS registered, we are able to collect all sealed and tagged recycling sacks from your FORS sites from one single collection location (the same as the delivery location). If your site is outside our service area our service provider will collect. Please note they are not FORS registered.

## What happens to your PPE?

Once your bins and bags have been collected, we take all the end of life PPE and create a new purpose for it such as: relief/removal blanket, insulation and hanging basket garden liners.

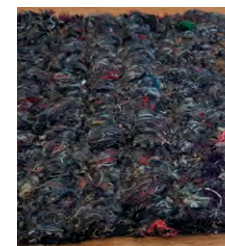

Garden Liner

Insulation

Relief Blankets

Regarm Substrate

# PLUS by OnSite Support

Our PLUS programme uses purchase data to highlight inefficiencies in the purchasing process and identify opportunities for improvement under the following areas: Purchase, Logistics, Use and Sustainability.

For customers looking to improve the sustainability of their operations, PLUS can help in a range of ways:

## Product packaging analysis

We can provide a detailed breakdown of the packaging on the products that have been ordered. From this we can help you switch to products with more environmentally conscious packaging, or in some cases, no packaging at all.

## Primary product material analysis

Some materials are more sustainable than others. By tracking what each product is made from we can help you to understand the materials being used. From

this, we can help you identify where less sustainable products can be switched for those that include recycled content or can be easily recycled.

## Carbon footprint

Frequent small orders to meet day to day requirements can result in a large cumulative carbon footprint from deliveries to site. To help reduce this, PLUS provides an overview of the orders made and the associated emissions.

Simple steps such as consolidation of orders can achieve significant reductions. For some clients we have achieved 25% reductions in Scope 3 emissions, and in 2020, we helped to save approximately 600 metric tonnes of CO2 for our customers through optimisation of their orders and deliveries.

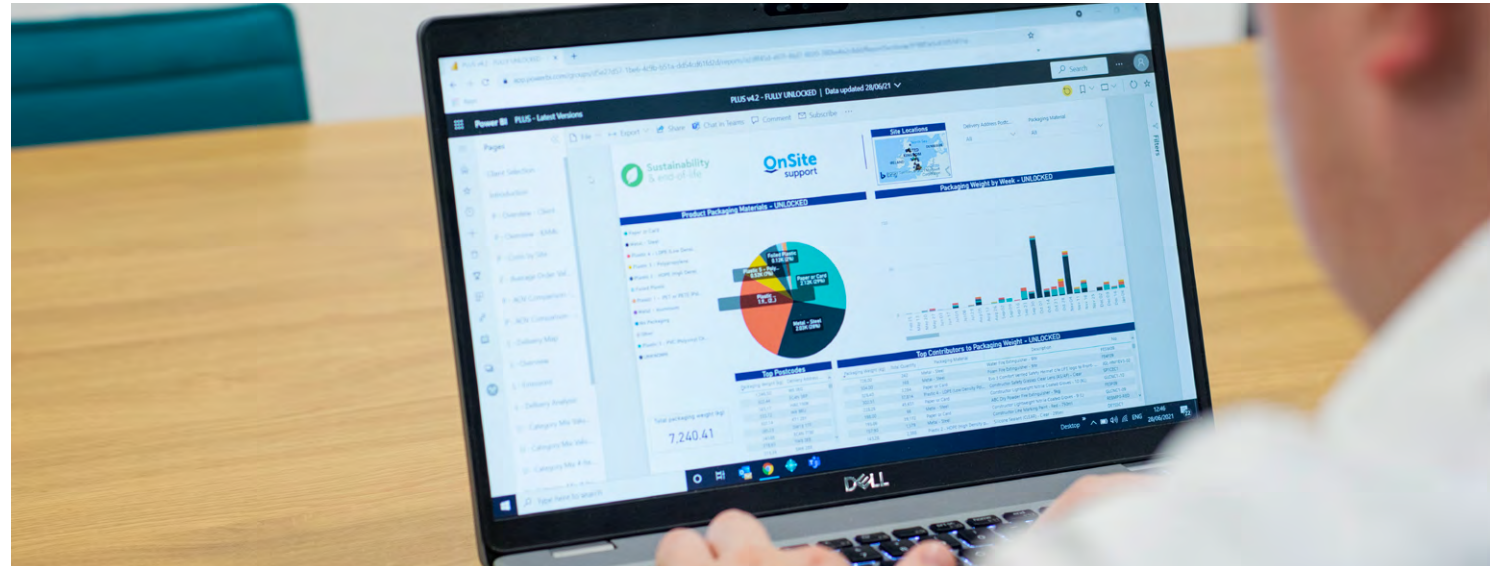

# PLUS by OnSite Support

## Recycling Data

For customers who use our PPE Recycling Service, the monthly data is included in the PLUS reporting and analysis. This ensures you have a complete picture of the sustainability of your PPE, site equipment and consumables.

To find out more about our PLUS programme visit

**EcoViz®** is a range of high visibility clothing made from recycled polyester - from either recycled post-customer clothing or from recycled plastic bottles. This uses 50% less energy and CO2 compared to using virgin oil-derived polyester. All EcoViz clothing is packaged in recycled bags which are oxo-biodegradable and all plastic tags have been replaced with sustainable jute string.

### LEO YARNACOTT Class 2 Hi-Vis ECOVIZ Coolviz Ultra Women's Maternity Long Sleeved Polo Shirt

- Specifically designed for pregnant women in the workplace

## Overshoes

In UK construction industry, millions of single plastic overshoes are consumed every year, which generate tons of plastic waste on sites that are ultimately destined to landfill. OnSite Reusable Overshoe made from recycled Taslan was launched in February 2021 to offer a sustainable solution to our customers to help them to reduce the waste generated from usage of blue single use plastic overshoes.

### OnSite Recycled, Reusable and Recyclable Overshoes

- Made from Recycled Polyester Taslan (Eco Friendly)
- Anti-slip silicon sole helps to reduce the risk of slipping on smooth/slippery surfaces (Better Grip compared to single use/ disposable overshoe)
- Comes with a loop system at the heel of the overshoe, making it easy to put on
- Washable
- Made from x6 recycle bottles

## Eyewear

Developed with the utmost respect of the environment, Solis Go Green combines all the fundamental protection, comfort and style, while being environmentally friendly. Bollé are proud to provide a 100% recyclable packaging made of recycled cardboard and silk paper. They also print user instructions directly onto the master packaging with vegetal-based ink. No plastic, less waste.

### Bollé Safety Eco Packaging

Bollé Safety have introduced Eco Packaging on selected products and are replacing plastic within their packaging with silk paper. All Bollé products listed in the catalogue come in the new Eco Packaging.

### Bollé SOLIS GO GREEN - Anti-Fog & Anti-Scratch Protected Safety Glasses - Eco Pack

- Anti-fog and anti-scratch protected
- 100% recycled nylon frame made from fishing nets
- 100% compliant to international safety standards (EN166 F rated)
